

Prof. Dr. Susana Rodríguez-Couto got her BSc and MSc in Chemistry (Industrial Chemistry) from the University of Santiago de Compostela in 1992 and her Ph.D. in Chemistry in 1999 from the University of Vigo, obtaining the maximal grade (*magna cum laude*) and, in addition, she awarded the Extraordinary Prize for Doctoral Thesis in Chemistry. She worked at the University of Santiago de Compostela as a Research Associate (2000), at the University of Vigo as an Associate Professor (2000-2004) and as an *Isidro Parga Pondal* Senior Researcher (2004) and at Rovira i Virgili University as a *Ramón y Cajal* Senior Researcher (2004-2008) and as an Ikerbasque Research Professor at Ceit-IK4 (2009-2019). She has also worked as an Invited Researcher at the Institute from Environmental Biotechnology, Graz University of Technology (Austria) and at the Department of Biological Engineering, Univeristy of Minho (Portugal). In 2008, she received the I3 Professor from the Spanish Ministry of Science and Education to the recognition of an outstanding research activity. Her main research interests are ligninolytic enzymes, bioreactor design, wastewater treatment, bioremediation, biodegradation, solid-state fermentation, submerged fermentation, immobilisation of microorganisms and enzymes and valorisation of lignocellulosic biomass. Overall, she has supervised 2 doctoral thesis, 6 master thesis and participated in 15 research projects. Non-confidential results have led to more than 130 international papers in outstanding journals (*h* index 40), 77 communications at both national and international conferences, 15 chapters in books and 2 books. She is also editor of several international journals and books.
