

Dr. Jin Shang is an assistant professor leading GasTech Laboratory (Gas Adsorption, Separation, Storage, and Catalysis) in the School of Energy and Environment at City University of Hong Kong. He did his PhD in Chemical Engineering at the University of Melbourne and postdoc work at the University of Melbourne and Georgia Institute of Technology. Dr. Shang specializes in molecular adsorption, separation, and storage using porous materials such as zeolites and metal-organic frameworks. His research is focused on understanding the fundamental physical chemistry of molecular adsorption process via combined experimental and computational methods, in order to rationally develop high-performance adsorbents. The target applications include carbon capture and utilization, methane purification from nature gas/biogas/landfill gas, nitrogen oxides removal and abatement, volatile organic compounds removal, energy gas storage, etc. Dr. Shang has published over 55 papers (h-index 16, citations 774, as of September 2019) in journals such as *Nature Communications*, *Journal of the American Chemical Society*, *Advanced Science*, *Advanced Materials*, *Advanced Functional Materials*, *Nano Letters*, *Chemical Communications*, *Chemical Engineering Journal*, etc.
